COUNTING THE VOTES.

A Slow and Tedious Operation-Only Two Wards Completed.

The election commissioners for Charleston County, Messrs. Montgomery, Bennett and E. W. M. Mackey, met in the Court-room at 9 o'clock yesterday morning for the purpose of counting the votes cast on Wednesday last.

The Bowen party was represented by Mesers John L. Little, W. H. Birnie and Joseph Quash, and the Reform party by Messrs. H. E. Young, G. W. Dingle and C. A. Burckmyer. The commissioners themselves, we suppose, were considered a sufficient guard for the DeLarge party. The United States deputy marshals demanded to be present while the count was going on, and their demand was refused by Commissioner Mackey, who declined to admit them until he had examined the law on the subject. This did not suit the deputy marshals, who already knew what their duties were, and soon afterward a communication was received from the United States District Attorney, giving notice that a motion would be made for a man damus to compel the commissioners to admit the inspectors of elections appointed by Judge Bond. The trouble then blew over, and the inspectors were admitted.

The box containing the votes polled in Ward 1 was first taken in hand, the commissioners and talley-keepers being closely watched by both Sowenites and Reformers. For the State Senate Edwin Bates leads the ticket with a majority of 219 over Mishaw and 311 over R. H. Cain. though the Scott party have a majority on the Governor ticket, it will be seen that our Representatives, owing to the spliting among the Radicals, are among the first on the list, and only three or four of the Bowen ticket come up with them. The count of this ward was not concluded until late in the afternoon, and Ward 2 was not disposed of until late at night. At the rate at which the commissioners are now moving, it is doubtful whether the 21,000 votes cast in the county can be counted out in even the full ten days allowed by law. The result in the city ought to be known by Friday at the atest.

The result of the count yesterday is shown in the accompanying table. In

WARD 1 The Reform majority is 88, the voting standing 523 for Carpenter, and 435 for Scott, General But ler, for Lieutenant-Governor, polls 529, beating Ransler by 95 votes. In 1868 the Lesesne majority in this ward was 73. The highest vote in the rard in 1868 was 466, and in 1870 is 529.

Por Congress, Bowen (Radical) beats DeLarge Radical) by 151 votes; and for the State Senate, Edwin Bates (Reform) beats Mishaw (dead) by 246 votes, and R. H. Cain (Radical) by 377 votes. The Reform candidates for the Legislature run pretty evenly, Messrs. Melchers and O'Neill polling the highest vote. It is a noteworthy fact that in this ward Timothy Hurley (Radical) runs last on the Bowen ticket. is a woman without hands or feet-the victim of

In this ward the Scott majority is 33 votes. Two mars ago the Radical majority was 122. Ransier beats General Butler by only 20 votes, and Bowen ical) bests DeLarge (Radical) by 88 votes. The box being opened, there arose some dispute as to the proper manner of counting, when the following method was agreed them. The tickets were all taken out and assorted according to their respective characters, the split and cut tickets being placed by themselves. Each of these piles were then separately counted, and the total set down to the name of each candidate on the ticket. In this manner all the straight tickets were very quickly disposed of, and the split and cut tlokets were there tallied on by name. There were at least a dezen varieties of tickets, besides the regular ones dut and manipulated in every conceivable manner. Several ambitious Scott men had verreached themselves by voting two tickets, thus having their ballots dast aside. A few citizens were also magnanimous enough to vote both the Radical and Reform ticket, and others, unable to decide upon either party, voted blanks. . THE CANDIDATES,

In the appended table the Reform candidates enter for adjudication.

crippled old skeletons can effect such results, what may not be done with the large number of healthy and vigorous persons who possess the public institutions generally. It is but a little while ago since the city of Charleston furnished daily food to more than three thousand paupers. Ought they not to have yielded some return for this public charity? If we are correctly informed, the alms houses in several of the Northern and Western States are made to yield an annual income to the treasury of from eight to twenty thousand dollars. We o Charleston, on the other hand, have paid out as much as forty thousand dollars a year for the same purpose, and the money, practically, has been poured down a hole. There is, unquestionably room for improvement in this respect, and certainly a necessity for financial reform. We

Another of the public institutions of Charleston decidedly worthy of notice, is the City Hospital, situated on the corner of Mazyck and Magazine streets, and on the same square with the City Jail. Formerly, the hospital was located in what is known as the "Tucker House," in the northeastern part of the city, but, for various reasons t was deemed best after the war to establish i in a more central place. One wing of the old 'Workhouse" was, therefore, prepared for the purpose, and here are now to be found the sick poor of the county. Originally, the building was not adapted to the requirements of such an insti tution, but, so to speak, it was "turned inside out," which secures two stories, with two large wards on each floor, a number of private room for "pay patients," apartments for the steward the resident physicians, dispensatory, &c. It is, however, still incomplete in its arrangements, and awaits enlargement and the addition of such for the use of the sick.

On entering the hospital enclosure, the first point of interest to be observed is the bakery From this place is supplied the bread eaten at the several public institutions in the city; that is to say, the Orphanhouse, Almshouse, Old Folks' Home, Stationhouse, Detective office, and House of Correction.

During the last quarter these establishments consumed 31,138 loaves, weighing one pound each. The cost to the city of this bread is only about three cents and seven tenths of a cent per loaf, and in point of quality it is not excelled in the best hotel of the country. Formerly the cost of the bread was six cents a loaf, so that there is a saving of nearly one half ... Only two men are employed in this department, but their system is admirable.

.From this point we pass into the House of Correction, where bad people crack rocks for a living; but there is just now little to laterest one here save bare walls-the inmates being few and far between-and we move on to the hospital department. A short flight of stairs carries us to the male ward—a large, well-ventilated L shaped apartment-one portion of which is devoted to the sick sailors. Many of the beds are oc- South Carolins; S. E. The colored ward is in a clean and condition, but somehow there is an amount of wretchedness among the patients which is indescribable. Disease appears to make deeper inroads in their constitutions, their sufferings seem more intense, and their natures less elastic than among the whites. They look cheerless and demoralized, albeit they are the recipients of the so thickly planted that a child can step from same care, food and nursing which is bestowed on every class of inmates in the hospital.

The insane department contains twenty-five curious specimens of lunatics and imbeciles. One believes himself to be General Beauregard. Another is the veritable India-rubber man, and will twist and distort-himself by the hour. A third finds his happiness in standing, for hours, upright as a post, and almost as motionless. A fourth walks perpetually in a beaten path, from one corner of the yard to the other, while a fifth entertains violent animosity against all spoons and plates, and damages them on the slightest provocation. The rooms in this ward are specially adapted to

P. Porcher, whe is the acting physician, visits the establishment twice a day, while the resident physicians are always on hand to meet an emer gency. As before stated, there are several important

changes in contemplation to perfect the hospital, but it is even now a model of economy, neatness and good order. Alderman J. D. Geddings, ever since the close of the war, has devoted his time and attention to these public institutions, and to his quiet, yet practical efforts, seconded by those of his coadjutors, is due much of their usefulness and excellence.

There is no question that some of our eleemosy nary establishments can be made self-supporting, and, in the present depleted condition of the city treasury, it is all important that such a purpose should be speedily accomplished. Let it be done at an early day.

THE CHAPMAN SISTERS .- The second appearance of these deservedly popular artistes in Charleston is announced for next Monday night. the 31st instant, the engagement lasting for one week. In every portion of the South these charming sisters have electrified their audiences, and captivated the senses of their hearers in the roll of burlesque, their last year's experience in Charleston, which was most gratifying, having been but a repetition of the reception extended them wherever they performed. The support given them this season will consist of a thoroughly organized stock company, fresh from the boards of Northern theatres, and moulde I into that state of perfection acquired only by continued service together under one management.

"MARY WARNER," at the Academy of Music last night, was highly enjoyed by a large and appreclative audience. "Mary Warner" is a new, romantic drama, by Tom Taylor, never before acted in this city. It was the sensation in London, just as "Our American Cousin," by the same author, was for years on both sides of the Atlan tic. The plot of the play is well conceived, full of surprises, plenty of action, and replete with dra matic scenes and interesting situations, Jet, at the same time, all through perfectly (though we may also say painfully) natural. But natural as is the story, the acting of the chief characters was still more so. The role of Mary Warner Laura Keene) was tragic, and one that showed to their best advantage all the genius and talent of the accomplished artist. We have so often spoken of the splendid acting of Miss Keene, of her deep, whole-souled earnestness, her inimitable naturalness, her fine action, and her clear. perfect enunciation, that it is unnecessary to recity. The thought occurs just here-if a body of peat it here. We would simply say that we never have seen better acting on the Charleston stage

than we saw last night. Mr. S. H. Hubbard, as George Warner, at once won the hearts of all the ladies. The character was well sustained all through. Mr. W. J. Hurley, as Bob Levitt, had a very difficult character to personate, and acquitted himself very handomely, and to the satisfaction of all present. Tollitt is a firstrate specimen both of Cockney and "Bobbie." The character suits Mr. Kenned admirably. Our theatre-going readers, doubtless, remember Mr. Kennedy from last winter, when he won the favor of his audiences by his happy rendition of whatever character he per sonated. He afforded the merrily disposed a vast deal of amusement, as the pompous, consequential, chattering, cowardly Sergeant of Police which he acted to the vary life, dropping his h' all over the stage.

Miss Addie Hubbard, as Milly Riggs, acted her part well and faithfully, winning the plaudits of pectators from first to last. Her dress and pearing were perfectly-true to nature.

In fact, every member of the cast did well, and we are greatly mistaken if a second performance of this play ("Mary Warner") will not secure a much larger house than was there last night. We can certainly recommend it, and would assure our readers that they lose a treat if they neglect an opportunity of going to see "Mary Warner."

TRIBUTE OF RESPECT.

At a regular convocation of Zerubbabel Chapter, No. 11, R. A. M., held on Friday evening, October 21, A. I. 2400, A. D. 1870, the following preamble and resolutions were unanimously adonted:

Whereas, it has pleased Almighty, God to take rem our midst Companion William E. Mikell, our late high priest. We bow in humble resignation to this Divine visitation of our Great Jehovah.

We murmur not, but we deeply mourn his loss. To us, his life, pure in its integrity, manly in its frankness, genunine in its simplicity, and gushing in its genial flow of tenderness, stands forth in all this beautiful symmetry, the rising arch of the New Temple, the inner man, with a heart for its crowning centre and support, as full of noble instincts, as it was free from gulle. The temporal arch has crumbled, and the copestone disappeared in the rubbish of Time, but we have the cheering hope that his bright spirit shines in the centre of a perfect arch on the dis-

NERVOUS HEADACHE, LIVER COMPLAINT, &c., &c.-The Brain being the most delicate and sensitive of all our organs, is neces sarily more or less affected by all our bodily allments. A headache is often the first symptom of a serious disease. If the nervous system is affected, there is always trouble at its source in the pericranium. And it may be here remarked every newspaper of any prominence in the west that as the nervous fibre pervades the entire frame, no part of the physical structure can be affected without the nerves suffering sympathetically. Liver complaint of every type affects the brain. Sometimes the effect is stupor, confusion of ideas, hypochondriasis; sometimes persistent or periodical headache. In any case, the best remedy that can be taken is PLANTATION BIT TERS. In headache proceeding from indigestion or biliousness, or both, the stomachic and antibillous properties of the preparation will soon relieve the torture by removing the cause. If the complaint is purely nervous-in other words, if it has originated in the nervous system, and is not the result of sympathy, the Bitters will be equally efficacious. So light and delicate are all the preparations

made from SEA MOSS FARINE that it is invaluable for invalids and all those requiring a light and easily digested food. oct24-mwf3D&C PERSONS HAVING WORKS OF

A GRAND EPOCH IN SCIENCE. from the time when, in 1834, Dr. RUGGE discovered "Carbolic Acid" and its extraordinary medical effects, nothing in the history of Medicine has equalled it. Largely used by the French physitans in treatment of consumptive and scrofnous diseases, it was introduced by the Court Phyniciau of Berlin, MAX ERNST HENRY, into Prus is, and from thence to the United States. No thing else of the present day can equal HEN RY'S SOLULION OR CARBOLIC CONSTITUTION RENOVATOR. SPREAD THE TRUTH SOME edical men insist that it is undignified to advertise a remedy, however valuable it may be. Queen reasoning this. It is like saying that an articl which the world needs should be hidden in a cor er-that blessings and benefits may be too widely diffused-that the means of protecting and re storing health should be a close monopoly, and ot accessible to all. The argument is bad. It is worse than that; it is inhuman. Suppose HOS TETTER'S STOMACH BITTERS—an absolute spe dife for dyspepsia, billousness and nervous debility-had never been known beyond the repertoir of the faculty, what would have been the conse quence? Instead of curing and invigorating mil lons, the good effects of the proparation would have been confined to a comparative few. There is the highest authority for saying that light should not be hid under a bushei; that whatever is excellent should be placed as a city on a hill where all men can take cognizance of it. It is upon this principle that the Bitters have been advertised, and continue to be advertised, it ern hemisphere, and that the spontaneous testi monials in its favor have been translated into a written languages. Thousands enjoy perfect health to-day who would be languishing on beds of sickness if the newspapers had not spread th truth with regard to this unequalled invigorant and corrective far and wide. Suppose profit has een reaped from this publicity. Is that any arrument against it? If the public health has been protected; if lives have been saved; if the feeble have been strengthened and the sick restored, great good has been accomplished; and who so mean as to grudge to exertions thus directed their Spool Cotton.
